The Limits of Individual Observation

[Element 1] + [Element 2] + ... [Element N] = Innumerable Compounds
[114 Base Units] × [Infinite Combinations]

With such a large number of elements, it is overwhelmingly difficult to **study the unique chemistry** of every element and their innumerable compounds individually.

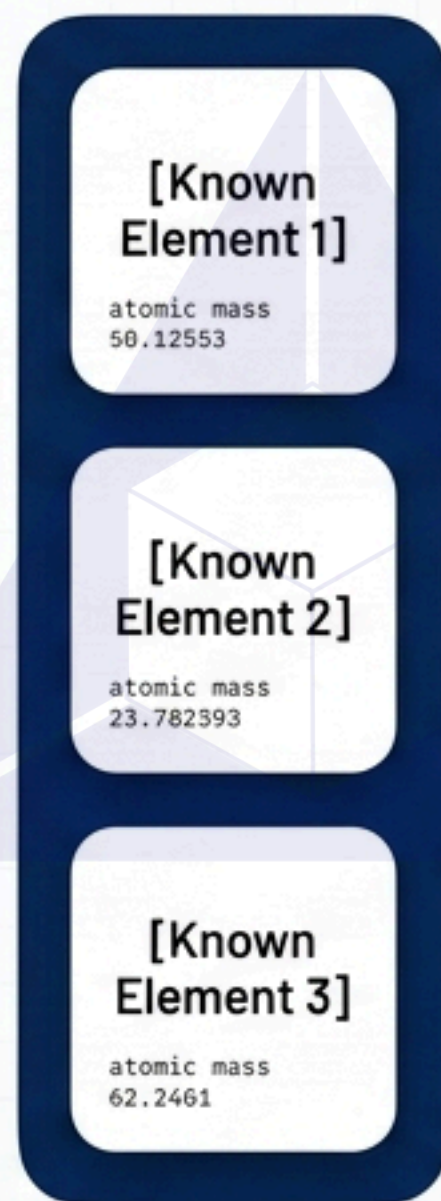

From Isolated Facts to a Unified System

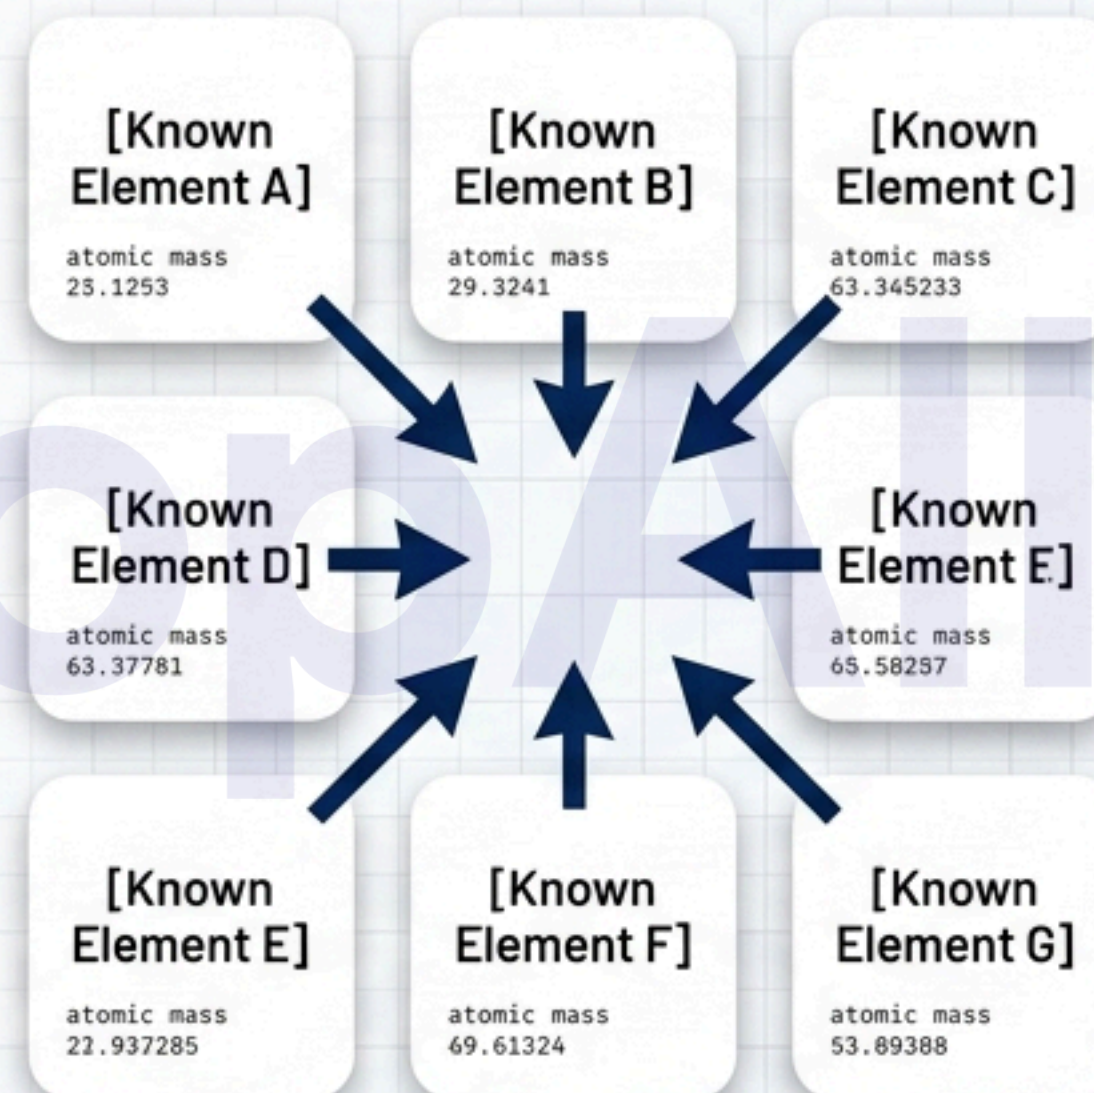

Scientists searched for a systematic way to organize their knowledge by **classifying the elements**, allowing them to shift from memorizing individual facts to understanding structural systems.

The True Power of Classification

Rationalize Known Facts

Predict the Unknown

A systematic classification does not just organize what we already know—it reveals hidden patterns and accurately predicts the facts of undiscovered elements for future study.
